

IN THE SPECIFICATION

The specification has been amended to remove all embedded hyperlinks.

A substitute specification is submitted herewith.

The substitute specification simply removes all the hyperlinks web addresses and embedded links that would otherwise be recognized by the USPTO scanning system. No substantive changes are made and nothing is added, therefore the applicant hopes that it may be submitted without the marked-up version, in the same way that it would be if the paragraphs had been renumbered. No new matter is added by these changes.
